REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the certified copy of the original Chinese priority document CN 03148547.2 along with its verified English translation has been received and overcomes the Gao et al. reference, as such the 102 rejection has been withdrawn. Likewise, as noted on page 2 of the previous Office Action, the claims are being interpreted as being drawn to compounds which must have alkylaminoalkoxy substituents as required by the preamble. The prior art fails to disclose or render obvious the instant compounds. The closest art is seen to be US 7,368,434 which teaches compounds having the same core as those instantly for inhibiting ALDH-2 and treating alcohol poisoning. US 7,312,344 discloses isoflavones for treating various cardio- and cerebrovascular diseases and diabetes. While the '434 and '344 patents teach the same class of compounds to be used in similar methods instantly claimed, they do not teach or suggest the actual compounds instantly claimed which require an alkylaminoalkoxy substituent contained on the isoflavone core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRAVISS C. MCINTOSH III whose telephone number is (571)272-0657. The examiner can normally be reached on M-F 9:30-6:00.
